I borrowed this book from a public library, and I'm planning to buy it once I return the one from the library. This book greatly informs the readers about these "red flags" that may hurt them on landing their perfect job. But beware... this book tends to call the readers "losers" or "failures" if you have more than one of those "red flags" or you still can't get a job and may make you depress if you keep reading. So don't go suicidal or something like that. The book doesn't tell you how to deal with them, so you have to buy their other book that deals with them.

This book outlines 150 tips for creating more effective resumes, letters, and applications that can substantially energize a job search. Rich with quizzes, examples, and websites.
