What Recruiters ACTUALLY want to see...By hyberian What sets this resume book apart from all the others is that the author distills his advice from some of the very top corporate and agency recruiters. This means that the recommendations he gives to create a top '5%' resume are not just taken to his own personal experience as a recruiter, but from the combined opinions of a large group of full time recruitment specialists from a variety of other companies. These recruiters are on the front line and they are the people who make the decision of who gets on the short-list of potential candidates. The author outlines a very approachable way to gather the information you need and then explains how to present your work history in a way that recruiters want to see. David Gardner's style is very easy to read and informal. Many of the books on this subject make for extremely dry

reading, but this book actually provides an impressively readable way to create an extremely effective resume. By following the well laid out advice in this book, I'm very confident that you will be able to produce a resume that gets noticed by recruiters - putting you in that all important short-list of candidates asked to come in for an interview. 23 of 34 people found the following review helpful. Incredibly valuable tool for anyone

By Paula GI ordered an early copy of this book anticipating its usefulness and I wasn't disappointed. The author taps into his many years experience as a recruiter to provide incredibly helpful (and sometimes surprising) tips and tricks to writing and improving personal resumes. The book is very straightforward, clearly written and super well-organized making it easy to pinpoint the section(s) most appropriate and useful to individual needs. The 'Survey Highlights' scattered throughout the book are not only helpful, they really motivated me to actually MAKE the changes to my resume (not just think making the changes 'someday'). I've already recommended 'Resume Success' to many others including the university students that I teach in New York City. It's a fierce job market out there these days and we can all use help like David Gardner provides in this book. 23 of 36 people found the following review helpful. A great read. A great book. A great resource!

By Nagu Gopalakrishnan The first thing you notice about this book is its cover: LOUD. Bright red and eye-catching. But I didn't buy it for the color. I'm an Intermediate Accountant and didn't want to be seen as just an accountant. After reading about all the research that went into the book, I bought it on David's website and felt strangely excited as I waited for it. Which is strange as it's not Harry Potter it's a resume book. I think that David was so convincing on his site it made me feel the book was going to be kind of magical. Well it came, and it actually kind of was. I read it once, and actually liked reading it. David has a playful and easy writing style that helps with such a dry topic. Then I read it again and started going through the instructions and doing it actually making my master resume. It's done now though I've not sent it out yet I truly do feel like it's an incredible manifestation of my professional life. I actually enjoy reading it. I've been to a couple of networking things this week and shown it around and everyone commented on it. I would highly recommend this book. Thanks so much David, and I'll send you a note of thanks as well on your site.
