Dr Callahan tells us that one of the six steps to becoming successful is to understand that "successful people are not victims". Event + Response = Outcome. Your response to events in your life determines your outcome. Don't fall victim to life's events. He moves on to define "self" as a company of one in which he defines the company roles of CEO, COO, CFO, CMO, and CRO. I must say that this book has helped me make a turn around in the work place. By evaluating myself in each of these roles, I have been able to understand how I, as an individual, add value to not only to my company but also to my personal life. If you are looking for a career change or even wanting to increase your effectiveness in the office, I suggest getting a copy of this book in your library!

What are the daily duties or responsibilities of those roles in very simple and plain words? "Resumes are worthless" is the right book for you.I am really impressed by certain things discussed in the book. One of them was formula, "Event + response = outcome" which explains events are not in our control but we can control how we respond to those events. One more interesting thing that I learned is Passion vision risk goal execute. This explains the evolution process or the steps to convert your passion as your career. The other useful things that were discussed in this book are various inspirational quotes and reference to many relative personality/career development books.I would summarize this book as a pocket dictionary to organize you as company of one.

If you are looking to take charge of your career, this is an excellent starting point whether you are looking to start your own gig or continue to work for others. Relating to the works by Rabbi Daniel Lapin (Thou Shall Prosper), Dan Miller (No More Mondays) and Robert Kyosaki (Rich Dad, Poor Dad), Dale adds to the literature by establishing the leadership concepts and roles for the Company of One. His exercises are thought-provoking and timely for today's information and knowledge worker. I believe it could have been better only by expanding upon the concepts presented in each of the roles that Dale defines. The best content in the book may be the networking and reverse interview techniques. Also, take a look at "Joe's Plan" in the back of the book for how to bring all of the concepts together in a hypothetical scenario. Most importantly, for this and all self-help books, take action! Don't waste your time reading it if you aren't going to take action to improve your life.

Learn to take back control of your earning power and your career!

From the Back Cover"Having a college degree is like having a powerful engine for a car - potential ready for application. Dale's concept of the Company of One is a needed perspective on today's changing workplace. Resumes are Worthless will help anyone put wheels on their hard work and preparation."Dan Miller, author48 Days to the Work You Love: Preparing for the New NormalAbout the AuthorDale Callahan is the director of the Information Engineering and Management graduate program at the University of Alabama at Birmingham. (uab.edu/iem) Dale's special niche is helping people be entrepreneurs wherever they are - allowing them to take control of their earning power and their career. Dale clearly sees how the future of companies will operate. He sees the employee / employer model in a state of total flux. Those looking for jobs and career the old fashion way are set for great amounts of frustration and instability. The only hope is to operate like a company of one - learning to behave like an entrepreneur even if you work for a fortune 100 corporation.
