Anurag Barua : SAP BW Ultimate Interview Questions, Answers, and Explanations: SAP BW Certification Review before purchasing it in order to gauge whether or not it would be worth my time, and all praised SAP BW Ultimate Interview Questions, Answers, and Explanations: SAP BW Certification Review:

6 of 8 people found the following review helpful. Why is this classed as a books and not a pamphlet?By HognoxiousOK, so size isn't everything. But for the price of this A5 pamphlet, you could buy an encyclopedia sized book on the same subject.Don't think the bigger books are competition for this one, though. They're designed for people who want to learn a subject and are prepared to put the time and effort in to do so; the target market for this comic is the kind who just want to parrot off answers in an interview.3 of 3 people found the following review helpful. Absurdly overpriced!By Anello SanvidoMy worst investment in BW books so far. It is not more than a pamphlet, with very low quality figures (print screens almost impossible to read).I expected much more from the price I paid.2 of 3 people found the following review helpful. OverpricedBy RomanThe book is good when you need to do a quick self-examination or pick questions for the interview.However, I think if you've already got \$60 to spend, it would be better to add another 20 and buy something more solid.

The Ultimate Learning Guide for SAP BW Consultants With Certification Review Questions, Answers, and Explanations! It's clear that SAP BW is one of the most challenging areas in SAP. And learning can be difficult. SAP BW Ultimate Interview Questions, Answers, and Explanations guides you through your learning process. From helping you to assess your BW skills to evaluating candidates for a job, SAP BW Interview Questions will put you on the path to understanding what you really need to know. The book is organized around five areas of SAP BW: Extraction, Modeling and Configuration, Transformation and Administration, Presentation and Analysis, and finally, Performance Tuning. More than just a rehash of SAP documentation and sales presentations, each question is based on project knowledge and experience gained on successful high-profile SAP implementations. Key interview topics include: - The most important BW settings to know - BW tables and transaction code quick references - Certification Examination Questions - Extraction, Modeling and Configuration - Transformations and Administration - Performance Tuning, Tips Tricks, and FAQ - Everything a BW resource needs to know before an interview

About the AuthorAnurag Barua has over 13 years of experience in conceiving, designing, managing and implementing complex software solutions including 8 years of SAP experience. He has been associated with several SAP implementations in various capacities. He worked at SAP Labs for 5 years. Anurags core SAP competencies extend beyond BW/BI and include FI/CO, Logistics, Netweaver, ABAP, SOX compliance, reporting, and project management. He has a B.S. in Computer Science from India and an MBA in Finance from the University of Maryland at College Park. Anurag lives in Germantown, Maryland with his wife and two children.Excerpt. A: Firstly, you need to create an append structure to the extract structure of a DataSource. You can do this by running transaction RSA6 or by running transaction SBIW and then executing the following configuration steps: 1. Postprocessing of DataSources 2. Edit DataSources and Application Component Hierarchy. This will take you to the screen with all the application nodes. You will have to expand each node until you get to the DataSource that needs to be enhanced. Place your cursor on this DataSource and click on the -Enhance Extraction Structure- button and create the append structure. Add the desired fields, save and activate the append structure. In order to populate the new fields, you need to add logic to SAP enhancement/customer exit RSAP0001 (in transaction SMOD). This exit/enhancement has 4 (function module) components: 1) EXIT_SAPLRSAP_001 for transaction DataSources, 2) EXIT_SAPLRSAP_002 for (master data) attribute DataSources, 3) EXIT_SAPLRSAP_003 for (master data) text DataSources and 4) EXIT_SAPLRSAP_004 for hierarchy DataSources. You will put your logic/code into an include. Since this single enhancement/exit is used for all DataSources, you will first need to check for the DataSource in your code (by using a CASE, WHEN, or IF conditionality). For any source system running Web AS 6.20 or higher, you can enhance Business Add-In (Badi) RSU5_SAPI_BADI (in transaction SE19). You will have to create your own implementation and enhance method DATA_TRANSFORM (for all non-hierarchy DataSources) and HIER_TRANSFORM (for all hierarchy DataSources).
