I would recommend people not to buy this book. I can write a better book this guy who is made lots of money at our expense and his book is terrible.0 of 0 people found the following review helpful. Waste of moneyBy gookgeekI should have listened other people's review. The half of the book is filled with a list of tables and t-codes. It is not worth the money.6 of 6 people found the following review helpful. Feeling like being robbed (I would like to give the book zero star,but 1 is the lowest)By Shu ZhangI felt like being robbed when got the book. It has about 75 pages(not remember clearly), but with very big font, and even some blank pages.....Sign! Before ordering it, I saw some one else's comment saying it is a rubbish. I am going to take the SAP FI/CO certification, so I thought the book might be helpful (it confuses me that the book does not say it is for certification interview, but it says "for certification interview" on website!). Now I think I could find much better and much more useful information from internet for free..... 54USD+10USD shipping = 64 usd!!!sign~~~~
