**Robert P. Baughman MD : Sarcoidosis, An Issue of Clinics in Chest Medicine, 1e (The Clinics: Internal Medicine)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Sarcoidosis, An Issue of Clinics in Chest Medicine, 1e (The Clinics: Internal Medicine):

6 of 7 people found the following review helpful. great book for all who are involved with sarc By BobSarc is a complex disease, this book, while in mostly medical speak, fills the voids for dr and sarc'ee alike. Patients can not

expect dr's to spend this kind of time with them to provide all this knowledge. If my family dr would have had this info, he might not have missed diagnosing me for over 2 yrs. Known as "harmles2" in the sarc community, I highly recommend this book. Here the table of contents: Sarc around the world Etiology of Sarc The Immunology of Sarc Genetics of Sarc Diagnosis of Sarc Cardio Imagin IN sarc Markers of Inflammation in Sarc Pulmonary Sarc Neuro Sarc Cardiac Sarc Hepatic, Ocular, Cutaneous Sarc Quality of Life Health with Sarc Treatment of Sarc Pulmonary Hypertension caused by Sarc Outcome of Sarc Buyers should note, each chapter is written by other authors who are reporting their observations in their specialty area. Usually multiple authors for each chapter. If you are not in the medical field, you may need a medical terms book to understand what each chapter covers. I think these are a compilation of articles that were written for "Clinics in Chest Medicine" but brought together for this book. This is a book of sarc specific info written by drs and researchers to other doctors.

This issue of Clinics in Chest Medicine focuses on Sarcoidosis. Drs. Baughman and Culver have put together an expert roster of authors for articles concerning: Etiology of sarcoidosis, Immunology of sarcoidosis, Genetics of Sarcoidosis, Diagnosis of sarcoidosis, Chest imaging, Biomarkers and genetic profiles, Pulmonary Sarcoidosis, Neurosarcoidosis, Cardiac Sarcoidosis, Ocular Sarcoidosis, Quality of life assessments, and more!
