**From Brand: Roberts Rinehart : Sea Searcher's Handbook: Activities from the Monterey Bay Aquarium** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Sea Searcher's Handbook: Activities from the Monterey Bay Aquarium:

0 of 0 people found the following review helpful. Fun book! We haven't done any of the activities ...By CustomerFun book! We haven't done any of the activities yet, but it is a great resource of information when teaching or learning about ocean life. The drawings of animals and plants are very well done.0 of 0 people found the following review helpful. Great ideas for using at the seashore.By MHThis book was originally given out free to teachers in the Monterey Bay area. It is a great resource for both parents and teachers who live on the west coast.

This delightful book explores rocky shores, wet-lands, sandy shores, kelp forests, and the open sea and deep sea, where kids will meet fascinating creatures from playful sea otters to mysterious sharks. For ages 5 to 15, these hands-on activities were written by marine educators and tested with 70,000 kids each year. More than 100 scientifically accurate illustrations of marine plants and animals appear throughout.

Sea Searchers Handbook is a treasury of information, activities and illustrations designed to help young people know, love and take care of the sea. For all of you teachers wondering how to better teach an ocean unit, don't pass up this wonderful book. -- Science and Children
