**Robert B. Altman, Neil A. Forbes : Self-Assessment Color Review of Avian Medicine (Sac)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Self-Assessment Color Review of Avian Medicine (Sac):

5 of 5 people found the following review helpful. Improve your clinical skills with a pleasant read. By J. Mayer The "Self-Assessment Color Review" collection is very nice and I can recommend the avian one. In my opinion, this book is not intended to give you a profound and detailed picture of the diseases but it more or less tries to confront you with real-life situations. Excellent for students or clinicians who want to deepen or broaden their interest.

In recent years there has been an explosion in our knowledge of avian disease, and avian medicine has become one of the fastest developing areas in the whole of veterinary medicine. In this Color Review, a group of internationally renowned avian experts--some in clinical practice, others working in universities--offer practitioners and students and overview of avian medicine and surgery in an easily assailable form. Over 200 cases are presented as illustrated questions and are followed by detailed explanations that add to your knowledge rather than just testing it. The cases appear in random order, as they would in practice, covering all the more common avian problems. Together they form an essential aid to examination preparation and a reference for continuing professional development.
