Persian or Arabic?By Darrah ChaveyAnother reviewer complains that because the book does not use the Persian title, "One Thousand and One Nights" (Hazar Afsan in Persian), the book cannot be a trustworthy source. It is true that the earliest references we have to stories in the tradition are Persian, dating to the 9th and 10th century, and the Scheherezade frame story comes from this Persian tradition. Nevertheless, the majority of the stories in the modern collections (14th century on) come from Iraqi, Syrian, Egyptian, and other Arab sources (as well as some Indian Sanskrit sources). And while they continue to use mostly Persian character names within those stories, they also use characters such as Prince Ahmad, an Arab name. This reviewer's sole complaint about this book is based on a flawed view of the history of this book (or tradition of books). I have found the book to be a tremendous source of information, history, and analysis, and recommend it highly. -- Darrah1 of 64 people found the following review helpful. Historically InaccurateBy S. DaneshvarThe whole story of One Thousand and One Nights is Persian and the characters are Persian, including pure Persian names, however its better known as "Arabian Nights". This book advocates this inaccurate name and therefore is not a trustworthy source for studying the "One Thousand and One Nights".While you are at it write a book on Alexander and call it the "Turkish Conqueror" who is a Ninja, historically accurate by your standards.
