**Princeton Review : The Best 282 Business Schools, 2007 (Graduate School Admissions Guides)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Best 282 Business Schools, 2007 (Graduate School Admissions Guides):

0 of 0 people found the following review helpful. MBA InformationBy Wish I could writeThis was the first book we purchased on the subject, but it was similar to the top 300 undergraduate schools books - Princeton Review, etc.This was very helpful in narrowing the field of possible schools and informative on the types of students.The average graduate's salary was also very helpful.4 of 5 people found the following review helpful. I was expecting much more.By N. GabaThis book gives some information that can be helpful1. A whole lot of stats (Academic rating, GPA ave, GMAT ave, # of students, student faculty ratio, joint degrees, financial facts, and a lot more!)2. A short

description/info on academics, career and placement, student life environment, admissions, + more of every school. Why I don't like it: 1. Most are just US schools. I expected more schools from Europe, Asia, Australia.. There are still a number of non-US schools. But I bought this book to have an idea of how other schools outside US are. 2. They are all MBA programs. I chose this book among others because it said "Best 282 Business Schools," not "Best 282 MBA programs." I intentionally excluded books with "MBA" on their title from my shopping list. There are a lot more programs than the MBA (Ms Finance, Ms Marketing, Ms International Business etc.) Business schools are not just about MBA programs. I was expecting see more of them from the book. The only non-MBA programs that they list are the joint-degrees available per school. If you're looking for an MBA program, this won't be a problem. 3. Academic rankings are..... absurd. I couldn't believe they gave University of Chicago just 78 points in academic ranking. Businessweek ranked that school #1, ahead of Harvard/Wharton/Stanford. They could have at least given Chicago an 85. One final note, if you plan to use this book to gather research information for your essays in top 30 schools, this won't be enough. You'll still need to interview/talk to the adcom, teachers, students or alumnus/alumna. 0 of 0 people found the following review helpful. A good resource By John W. Oxford If your having trouble finding which business school to attend this can greatly help you. Very detailed and ranks schools within given regions.

Get everything you need to know to make the right decision! This insiders perspective on the nations top business schools provides rankings based on student surveys, just like those made popular by The Princeton Reviews Best 361 Colleges guide. Best 282 Business Schools also includes student quotes about classes, professors, the social scene and more, as well as a complete index of schools throughout the country with basic information on their programs. Plus, it covers the ins and outs of admissions and financial aid, and the schools get an opportunity to talk back by including their own profiles. Best 282 Business Schools has all the information you need to find the perfect match in a business school.
