Therese Dobroslavic : The Canadian Dictionary of Abbreviations before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Canadian Dictionary of Abbreviations:

This comprehensive reference work contains approximately 18,000 English- and French-language abbreviations, initialisms, and acronyms commonly used in Canada. The bilingual, alphabetical listings include phrases from the

fields of business, finance, the arts, government, academia, entertainment, and the military. Each entry is accompanied by a definition, an alternative language translation and cross-reference if necessary, relevant information about the founding and expiration of the organization, and useful explanatory notations. In addition to abbreviations that are specifically relevant to Canadian institutions, the resource also lists general abbreviations that are widely seen and used in Canada, as well as those of international organizations and institutions of which Canada is a member.

About the AuthorThrese Dobroslavic is a librarian at the Vancouver Public Library.
