It has information on types of chiles, history of the chile trade, chile production, and a good number of recipes. As other reviewers have noted, a doubt it has everything about chiles (I doubt any book does). On the other hand, there is a wealth of good information in this book. I love chiles and have been growing them, cooking with them and reading about them for years. I learned a good deal of new information from this book.0 of 0 people found the following review helpful. Lots of good informationBy Barry P.

EvansJust about everything that one would like to know about Hot Peppers.4 of 4 people found the following review helpful. This Chili Pepper encyclopediaBy Sheila ShultzI am so disappointed in this book I can not even tell you. I thought it would have more information on the actual peppers and pictures and it was all in black and white and I won't use these recipes. It should be labeled as a cook book not a book of true information.

The Chile Pepper Encyclopedia has the answer to just about any question one could ask about chile peppers. Which chiles are the hottest? What country did the first chile plants come from? What popular brand of dandruff shampoo is made with chile peppers? Can chiles really be used to cure headaches? Even the most devoted "chile-heads" will be satisfied. The encyclopedia is researched and written by Dave Dewitt, the country's foremost expert on hot and spicy foods and longtime editor-in-chief of Chile Pepper magazine.In addition to entries on chile species, culture, terminology, and agriculture, the encyclopedia includes more than one hundred fiery recipes like Madras Fried Chile Fritters from India and Jamaican Jerk Chicken Wings are sure to please any hot-and-spicy food lover. Black and white drawings and photographs, charts, and graphs appear throughout, and an eight page insert includes color photographs of dozens of varieties of chiles, invaluable for identification. The Chile Pepper Encyclopedia is an indispensable sourcebook for chile aficionados, gardeners, cooks, and anyone else who has a burning interest in fiery foods.
