I gave four stars only because of the cloth diaper section.Pros:- simple, easy ideas for using/re-using household items for baby- resource for coupons websites- advice on what to buy new, used or skipCons - Cloth Diaper Section:- Savings: says only \$25/mo saved using cloth diapers. Crazy - I save more than \$25/mo using cloth! And no,

my water electricity bills have not risen!- Laundry: doesn't mention that you should use a clean-rinsing detergent only(VASKA, Nellie's Laundry Soda, Allen's Naturally, Charlie's Soap, etc). She's right that it is more laundry, but doesn't take more than 10 extra min throwing in the washer dryer (may take 15 min if you line dry). And you generally only need to do a load every 2 days.- Newborn diapers: she says to skip these. I say DO NOT unless your baby is very large at birth. Yes, baby won't be in them very long (up to 4 wks), but these diapers w/umbilical fold are a lifesaver. The amount of diapers NBs go thru will shock your wallet if using disposables!-Cost: the initial investment is more, but she only lists Ebay mommysavers.com for buying diapers. Check out cottonbabies.com (great selection, fantastic customer service), greenmountaindiapers.com (cheapest diapers, all cotton), fuzzibunzstore.com (best one-size pocket diaper in my opinion) for reasonably price sampler packages individual diapers-Diaper Pins: use Snappis instead (I do)1 of 1 people found the following review helpful. Most of the advice in there is somewhat redundant, gross, and common knowledge. The rest seems to be more expensive and time consuming in the long run. I think that if you're a stay at home mom, and have the time to devote to all the tips and tricks included, this book would be helpful. Otherwise, I would stick to online promo codes and coupons.

Even if you have a reasonable co-pay, they can be expensive. Look for generic over-the-counter prenatal vitamins at discount stores and pharmacies to save even more money. 2. Pregnancy books, workout videos, etc., are great to have, but don't pay full price for them. They often wind up at secondhand stores, thrift shops, eBay, and consignment stores. 3. Better yet, borrow books and DVDs from the library before purchasing them. If you don't see what you want, request it via interlibrary loan. 4. Don't buy an expensive body pillow from a maternity store. Wal-Mart carries a full-length pillow for under \$10. If you find it to be too overstuffed for your liking, just open a seam and remove some of the fiberfill. 5. Steer clear of expensive creams that say they can prevent or erase stretch marks. While they sound wonderful, they can't live up to their claims. Heredity gave you stretch marks, and no amount of cream will erase them. On the upside, stretch marks do tend to fade with time. 6. Talk to your employer about the benefits you'll receive while on maternity leave. Some offer paid leave if you qualify. Most offer short-term disability for a short time after your baby is born, which is meant to cover your salary (or a portion of it) while you are unable to work due to illness or injury or childbirth.
