Todd Palmer obviously has -- and shares -- a fund of knowledge of hiring from the perspective of someone who deals with it professionally every day. He covers the introspective journey with job seekers -- an incredibly important intangible for anyone looking for work.

Knowing yourself and conveying your expectations and skills to potential employers is the key to landing a job. You may be 100 times better than any other candidate, but if you do not know or cannot convey who you are and what you are capable of in complete confidence, you will never get hired. The detail in this book is fantastic. There is a checklist for transferable skills, examples of chronological and functional resumes as well as good and poorly written resumes. There are lists of action words for each skill set, cover letter dos and don'ts, tips on networking, leveraging social media, and resume writing. Todd Palmer's process goes over interviewing, telephone interviews, thank you notes, when and how to discuss compensation and benefits. He also walks you through scheduling and tracking your job search progress. Todd Palmer goes over how to dress, how and when to negotiate, when to walk away. This book is a well-defined and thorough review of everything you need to successfully execute your job search. A great graduation gift (which is why I bought it!) but really a must-have tool for all graduates. Finding a career and work that you love and that is a good fit for your circumstances is difficult. The job market is very competitive these days and hiring managers have a deep pool of talent to choose from. I feel this book provides the edge and I am excited to share it with my graduate!

By UnderDog I have to be honest that I was worried that this was going to be like so many others books on how to get a job, but I was delightfully surprised. Todd gives so much more good advice and some tips that I have never even thought of like having business cards with a condensed resume and your contact info to hand out to every person you meet. Very clever! And chapter nine's Bonus Step: The Last -Ditch Effort is a very creative idea after you've been turned down for your dream job. Could of used that idea years ago for a couple of jobs that I had applied for and wanted badly. I highly recommend this book for anyone that is in the market for a new job. It would also make for a great gift for a college grad.

By Alex Burkulas Very well written book that outlines the pragmatic "process" of getting your dream job. Very clear, straight forward and right to the point. I bought a copy for a family member and they have found it invaluable in their search for a new job. Well done.
