Unfortunately some gadgets end up making life more complicated for those not keeping up on the latest technology. Mr. Gadget breaks the overall topic of modern gadgets up into relatable groups. Then with each group he goes over the subject matter in easy to understand everyday language. This makes shopping for that next need-want-toy-tool painless. I learned a few things from the book and then passed it on to my Mother-In-Law for her to use. She too found it useful and soon had a new printer among other things. Thank you Mr. Gadget!0 of 0 people found the following review helpful. This man is dedicated to your success with electronicsBy ROBERT C. CRANEMr Gadget writes a very helpful book about what we should know before we purchase a product. More importantly he sets a standard and provides logical education on how to choose the right product. The book reminds me of a parent advising their offspring from firsthand experience about products that may or may not deliver what they promise.I have experience with electronics and like to think of myself as a general know-it-all. I felt a little shameful while I was learning things I should have known and even thought I knew. Most everyone who reads the book will learn something valuable. I am much wiser in regards to data backup, printer selection and even keeping my car windshield clear. There are plenty more products reviewed too. I have met Mr Gadget many times and we are professional friends. There is nobody as dedicated to find the truth about a product.2 of 2 people found the following review helpful. wish i knew this stuff 20 years agoBy Charles MarcusAs a 'low-tech' guy, this book was pretty easy for me to understand.Besides the fact that i will save a fair amount of \$ on my next computer and printer purchase, I learned about stuff out there that I hadn't a clue about. Really useful devices, gadgets, emergency stuff, practical stuff, technical stuff, fun stuff. He states actual name brands, costs, and where to buy it. A most interesting and practical book! I highly recommend.

Are you confused about consumer electronics, gadgetry and technology? Steve Kruschen, the one and only Mr. Gadget, reveals what to buy and why to buy it in "The Mr. Gadget Consumer Tech Guide. Before you buy a computer, phone, printer, radio, television, vacuum cleaner, kitchen knives or dozens of other gadgets, save time and money by checking out the recommendations in this handy guide from Americas foremost consumer technology commentator Steve Kruschen, the guy who tries it before you buy it! For more than three decades, Steve has been testing, demonstrating and reporting on consumer electronics, gadgets and new technology. He checks out products in a real-world, hands-on environment just the way the average consumer would. As Mr. Gadget, Steve helps consumers make intelligent buying decisions by providing radio, TV and Internet audiences with his trusted evaluations of the latest and greatest. Thanks to his numerous radio and TV appearances, including "Fox Friends" (FOX), "The Early Show" (CBS), "Early Today" (NBC), "Power Lunch" (CNBC), plus appearances on CNN, The Weather Channel and dozens of news shows in major cities, consumers rely upon the expert advice of Mr. Gadget. When he is not appearing on television, Steve is speaking to corporate and trade association audiences on how to improve productivity with personal technology. Steve lives in Southern California with his wife, The Long Suffering Mrs. Gadget (and their three children when they visit). Batteries not included.
