This book has the most comprehensive explanation I have found about Network Marketing. It gives clear, well studied and objective reasons why you should support Network Marketing professionals and companies. It also provides great scripts for Network Marketing professionals to use to talk to potential clients who believe the myths about the profession. I would highly recommend that Network Marketer's read it, and also anyone who is skeptical about the industry so they can understand how it works and how to support their friends and family members who are trying to make a better life for themselves and their families.
