Curt Greene, Norman Chris Boring, John D. Campbell : The New Care and Training of the Trotter and Pacer before purchasing it in order to gauge whether or not it would be worth my time, and all praised The New Care and Training of the Trotter and Pacer:

1 of 1 people found the following review helpful. My husband's favorite book By Lauren C Bought this for my husband he is involved in harness racing. He had the old 1950's version and I bought him this version for Christmas. He is not a reader but he can be seen reading it every evening. It has all the information for someone interested in raising or buying and racing horses for harness racing. 0 of 0 people found the following review helpful. Five Stars By

CPExcellent reference book for horse owners.1 of 1 people found the following review helpful. A very good tutorialBy Jussi TomperiI think that "The New Care and Training of the Trotter Pacer" provides an easily readable tutorial to the harness racing and welfare of a horse. The book contains chapters from virtually all relevant areas of training and maintaining horses and some of the authors are even able to provide some detailed tips on specific issues of shoeing, training and caretaking. Although it should be kept in mind that there is no universal truth in horse training racing I believe that the authors of the book provide lots to think about within their area of specialty.For a European-based reader these a word of caution: one should always reflect the content of the book against the American racing culture. For instance, in America horses predominantly race at the ages 2 and 3 whereas in most parts of Europe horses race at the ages 3 and above. These type of differences should be taken into account when adapting the methods etc. provided by the authors of the book.Nevertheless, a very recommended reading for any horseman!

Care Training of the Trotter Pacer has long been the bible of harness horsemen. The New Care Training of the Trotter Pacer picks up where the old one left off. Learn what today's harness racing greats such as John Campbell, Robert McIntosh, Gene Riegle, Thomas Haughton and others know about yearling selection, training trotters and pacers, conditioning, driving strategy and much more. Required reading for every harness racing professional or amateur.
